Application/Control Number: 09/823,850

Art Unit: 1631

#### **DETAILED ACTION**

Claims 1-85 are pending in this application.

Applicant's arguments filed 11/21/03 have been fully considered but they are not completely persuasive. Any rejection not repeated below has been withdrawn.

## **Drawings**

New corrected drawings are **required** in this application because In Figure 3, the sheet that was submitted is missing critical information that was present in the originally filed drawing. The Examiner has attached a copy of original Figure 3, and the new figure submitted 11/21/03. The examiner has drawn arrows towards the areas missing in the new drawing, and their placement in the original drawing. Essentially, all the panels for Figure 3A and 3B are blank in the new figure. Therefore, the new Figure 3 is new matter. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will **not** be held in abeyance.

#### **Specification**

The amendment [response] filed 11/21/03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: See the objection to Figure 3 set forth above.

Applicant is required to cancel the new matter in the reply to this Office Action.

#### Rejections Maintained

Claims 1-85 are rejected under 35 U.S.C. 102(a) as being anticipated by Ideker et al. (2000).

The response indicates that an affidavit regarding inventorship and authorship of this publication would be submitted to overcome this rejection. As of the date of this communication, no such affidavit is of record.

Application/Control Number: 09/823,850

Art Unit: 1631

1.54

Ideker et al. (Journal of Computational Biology Vol. 7 No. 6 pages 805-817 (4/3/00)) discloses Maximum likelihood analysis of microarray data wherein the true or relative analyte signal is obtained. This document has a differing inventive entity from the instant application, and was published within the year prior to the filing date of the instant application. The same methods as those being claimed are disclosed and explained.

### Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary K Zeman whose telephone number is (571) 272-0723.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, can be reached at (571) 272-0722.

The Official fax number for this Art Unit is: (703) 872-9306

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the TC1600 Receptionist whose telephone number is (703) 308-0196.
